

Hello from Your Fellow Lincoln County OK Landowners!

We are very concerned landowners/residents in Lincoln County, Oklahoma, who recently learned that Apex (Sandstone Project) and Enel (Cedar Run Project) are planning to install 612' tall wind turbines across our county. While we're all environmentally minded, the fact is that each solution to sustainable energy is not appropriate in all locations...and the fact is Lincoln County is **too populated** for wind turbines!

Why should you care? Because we're your "neighbors". Some of us have lived here for 5 generations; our ancestors homesteaded this land. Other families bought overworked, overgrown land and turned it into something beautiful. Many others left the noise of the big city to raise a family or to retire to our slower paced, tranquil Lincoln County. Our way of life is now being threatened by these huge U.S. government subsidized companies.

One cannot live safely anywhere near a 612' wind turbine! They may seem quiet when you see them at a distance, but within their shadow they cause wide-ranging health problems that trigger epileptic seizures and aggravate heart conditions and they produce pollutants that threaten our vital central Oklahoma Garber Wellington Aquifer as well as wildlife, animals and crops. Finally, the defunct turbines (which have only a 20-year lifespan, are often abandoned and never deconstructed.

Please read the attached flyer to understand the dangers. Many of us have read the contracts offered by Apex and Enel and are horrified at their terms. If you have received a contract, PLEASE READ IT CAREFULLY—have your lawyer read it. Ultimately, we ask you to fully consider the impact of the proposed turbines on you and our communities. The promised financial compensation is tempting to all of us; but will that financial gain offset the downsides to us, your neighbors?

Respectfully,

Lincoln County Coalition Against Wind Turbines
